

Digital Employee - Elevate your Sales, Service & Success!

Built from scratch with GPT

All major languages

Multimedia (image & video)

Embeds in your Agent platforms

Omni channel (chat, email, sms, social)

Continuously improve

Scale your business with Aissist.io

Improve sales conversion, higher than human, proved!

Automate **70%+** workload, free up team on strategically important item

4X improvement on cost efficiency

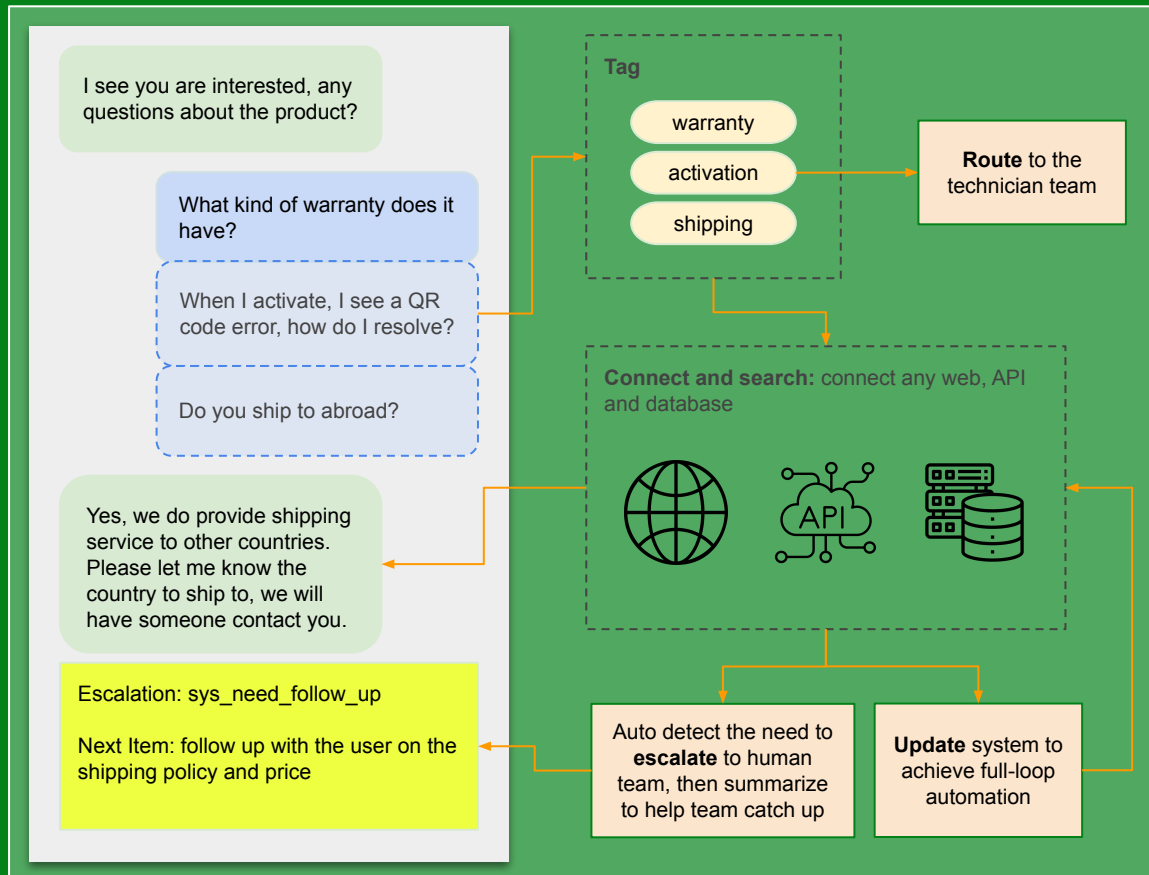

Scale up and down flexibly on demand

No more worry about attrition and inconsistent quality

The market's leading Multi-agent and Multi-task AI

Full-cycle automation that automates 70% - 95% of your workload

Tag anything in any way with one line of description

Resolve 70%+ workload, with human touch

Auto escalate with summary and next steps

End to end 5 - 15 seconds

Generate insight on customers and improvements

Intelligently follow up to drive up conversion & resolution

Connect and update information for full-loop

Operates in Agent platforms, functions like a human, and collaborates with team

Response - humanized response tailored to your business and brand voice

Smart tagging - tag anything in any way, based on the context, not keyword

Multimedia - support processing of image and video

Help! Installation failed

Sales email ▾ **Installation** **Internet** **Sys_human_follow_up**

Will Smith WS

I just installed it but somehow it shows red flashlight on the panel, how can I fix it?

AI Aissist.io

Hi Will, I'm thrilled to assist you with the issue! It looks that the internet connectivity is not properly set. You may consider reset the network configuration and confirm your internet connection is sound. Please see the [link](#) for more details on the debug. If you continue to have issue, please let us know and we will send technicians to fix the issues for you.

AI

Aissist: **Escalation (sys_human_follow_up, Aassistant said that someone will arrange technicians if the user continues to have the issue.)**

Next step: "Wait for the further input from user to see whether there is a need to send the technician"

Summary: "Will Smith has an issue of installing the product"

Unanswered: "None, all the questions have been addressed"

Escalation - auto detect the needs for human to follow and provide summary for the team to rapidly catch up

**10 minutes to
stand it up;
splendidly
easy to
maintain**

Turn your existing assets (website, articles) into intelligence

No tedious flows, No rules, No code. Only you need to do is to provide guidelines

Tag anything in any way with one line of description

Ready to connect to any system or database with publicly accessible API

Continuously improve with live examples provided by experts

Guideline

Customize AI to your business needs, processes and brand voice; no intents or flows - super easy, extremely powerful

Instruction

Guide AI towards your brand voice and business needs

DISCARD SAVE

INSTRUCTION CONTEXT TASK

Instructions + ADD IMPORT

Provide guidance to Aissistant's behavior, such as "be concise on response"

- greeting --
If use just provided name and email, that's the start of conversation from web chat, therefore you just simply say something like what can I do for you.
- negative --
If the user expressed negative feel or swear, escalate to human team.
- null --
If user asks for demo, tell them to schedule demo on <https://calendly.com/sales-aissist/30min>, and tell them sales team will reach back to them if there are other questions.
if user asks to talk with human, say you will transfer immediately and someone will contact the user shortly.
If the context contains multiple possible answers or the user's question is not clear enough within the context to have the clearly best answer, ask clarifying questions until a clearly best answer emerges
- signature --
If the conversation channel is email, add the following signature behind response, otherwise don't add any signature.
Best Regards,
[Your Aissist.io Team](<https://aissist.io/>)

Guide the AI like how you would train an intern, a method that is super easy and extremely powerful.

Assets

Turn your
hand-book and
protocols into
intelligence in no
time

Assets Debug

Assets are used to provide your business specific knowledges to Aassistant. The acceptable assets are websites and/or articles (documents/spreadsheets/pdfs).

Don't waste your assets, let our AI turn it into intelligence that you can immediately use.

Smart Tag

Tag anything with one line of description, keep your inbox neatly organized, managed and prioritized

Smart Tag (tag anything)
Smart Tag provides a super easy way to identify interested traffic / customer and keep the inbox organized. Besides, it also offers a powerful way of in-context control with granularity.

ADD TAGGER IMPORT TAGGERS 

Respond ONLY to tagged 

Q Search tagger, press 'enter'

SESSION CONTROL

ASSETS (0)

FOLLOWUPS (0)

Basic

Tag Name *

return_or_refund

words concatenated by "-"

Direction *

Inbound

The time when the tag detection happens. 'Inbound': detection happens with user input. 'Output': detection happens after AI generated response.

Scenario (mandatory) *

the user wants to return the product or get refund

The trigger of corresponding tag. Describe the scenarios for the tag in natural language; e.g., 'user asks to speak with human'
Instruction (optional)

Firstly, acknowledge user's request. Secondly, tell user to visit the website <https://doc.aissist.io/refund> for more details.

Check whether the product has been shipped with @function_call:check_order. If shipped, let user know the tracking url. If not, let the user know that it normally takes 5 days for refund to be processed.

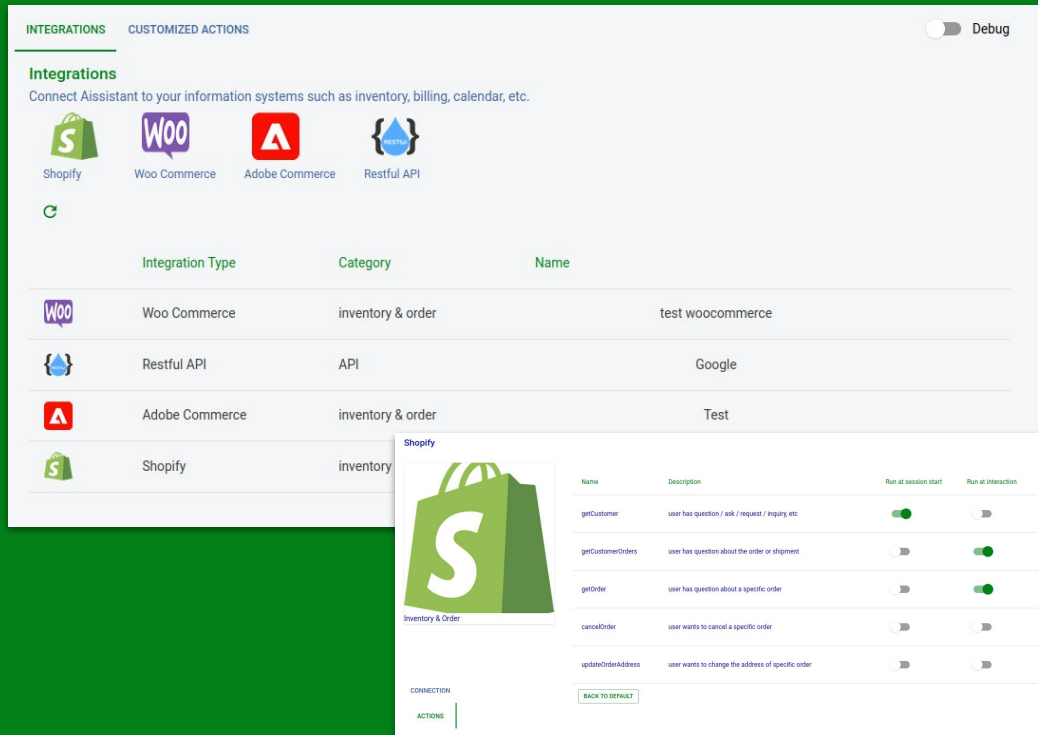

The additional instruction will be provided to AI to tune the behavior, when tag is detected. The provided instruction will stay through the session.

CLOSE SUBMIT

Hard to organize your inbox? Use our tag with one line of sentence.

Smart Action

Connect and update any system & database to achieve full-loop automation

The screenshot displays the 'INTEGRATIONS' section of the Aissist interface. At the top, there are tabs for 'INTEGRATIONS' and 'CUSTOMIZED ACTIONS', along with a 'Debug' toggle. Below the tabs, the 'Integrations' section is titled 'Connect Aissistant to your information systems such as inventory, billing, calendar, etc.' and features icons for Shopify, Woo Commerce, Adobe Commerce, and Restful API.

Below the icons is a table listing the connected integrations:

Integration Type	Category	Name
 Woo Commerce	inventory & order	test woocommerce
 Restful API	API	Google
 Adobe Commerce	inventory & order	Test
 Shopify	inventory	

A modal window is open for the 'Shopify' integration, showing a list of actions with their descriptions and status toggles:

Name	Description	Run at session start	Run at interaction
getCustomer	user has question / ask / request / inquiry etc	<input checked="" type="checkbox"/>	<input type="checkbox"/>
getCustomerOrders	user has question about the order or shipment	<input type="checkbox"/>	<input checked="" type="checkbox"/>
getOrder	user has question about a specific order	<input type="checkbox"/>	<input checked="" type="checkbox"/>
cancelOrder	user wants to cancel a specific order	<input type="checkbox"/>	<input type="checkbox"/>
updateOrderAddress	user wants to change the address of specific order	<input type="checkbox"/>	<input type="checkbox"/>

At the bottom of the modal, there are sections for 'CONNECTION' and 'ACTIONS', and a 'BACK TO DEFAULT' button.

Our AI is as useful as how much you feed it. Connect AI with any of your system and database.

Smart Follow-up

Automatically and intelligently follow up to drive up the sales conversion and service resolution

Followup (Nudging)
Easily set up context-aware followup (nudging) to better close the deal, resolve the issue and collect the information
Beta, contact sales@assist.io for more details.

[ADD FOLLOWUP](#) 

Name	Associated Tag Only activated with the tag	Trigger The scenario for potential followup	Snooze The wait time	Instruction The instruction to follow when fire followup	
followup_any_question		If the system said it will find someone else to reach out.	After 2 minutes	follow up to ask whether someone has contact the user.	

Do you know 40%+ of conversation left abandoned without being noticed? Don't let those slip off the crack.

Insight

Generate insight of customers, tickets and even business improvements in one click

Insight
Create and view insight on keyword, sentiment, topics, etc, of conversations / tickets. Additional cost applies (\$5 per 100 sampled conversations/tickets). Recommended sample ratio is 10 - 20%.
